ZOUHEIR HAJJ SLEIMAN

Project Manager | Construction & Infrastructure | M.E. (Structural), AUB

Beirut, Lebanon • +961 3 763 274 • zouheirsleiman@gmail.com • LinkedIn: linkedin.com/in/zouheir-hajj-sleiman

PROFESSIONAL SUMMARY

Project Manager with over a decade of experience delivering capital construction, infrastructure, and institutional projects across Lebanon, with full responsibility for execution, scheduling, contract administration, procurement, cost control, and subcontractor management. Proven track record on multi-million-dollar donor-funded programmes (UNHCR, World Bank, UNDP, UNICEF, ESFD, CDR) spanning academic, healthcare, WASH, and public infrastructure sectors. Experienced FIDIC Red Book practitioner covering the full contract lifecycle — tendering, payment certification, claims and variations, and final account closure. Holds Class A Contractor classification with the Lebanese Syndicate of Public Contractors and the Ministry of Public Works and Transportation. Strong technical foundation as a Civil and Structural Engineer (M.E., AUB) providing direct constructability insight and enabling effective coordination between design teams, site crews, and client representatives across concurrent project sites.

CORE COMPETENCIES

Project Management Programme Planning & Scheduling (Primavera P6) • Multi-Project Execution • Milestone Tracking • Risk Management • Progress Reporting

Contract Administration FIDIC Red Book • Tendering & Bid Evaluation • BOQ Preparation • Payment Certificates • Claims & Variations • Final Account Closure

Cost & Procurement Budget Development & Cost Control • Procurement Management • Subcontractor Tendering • Material Submittals & Approvals • Financial Reporting

Site Management Construction Supervision • Quality Control • HSE Compliance • Subcontractor Coordination • RFI & Technical Query Management

Stakeholder Management Donor & Client Liaison (UNHCR, World Bank, UNDP, UNICEF, ESFD, CDR) • Municipality Coordination • Consultant Interface • Community Engagement

Regulatory & Local Lebanese Construction Law • Municipal Permits & OAR Procedures • Cadastral Processes • Class A Contractor Requirements

Software & Tools Primavera P6 • AutoCAD • MS Office Suite (Excel, Word, Project)

Languages Arabic (Native) • English (Fluent) • French (Working Proficiency)

PROFESSIONAL EXPERIENCE

Project Manager & Engineering Manager *July 2021 – Present*

THE CUBE Construction | *Beirut, Lebanon*

- Manage concurrent construction projects across residential, commercial, institutional, and infrastructure sectors, overseeing the full delivery cycle from design coordination and tendering through execution and client handover.
- Administer FIDIC Red Book contracts end-to-end: prepare and issue tender packages, evaluate bids, manage subcontractor appointments, process payment certificates, administer variation orders, and handle claims through to final account.
- Develop and maintain project schedules using Primavera P6, tracking milestones, identifying programme risks, and implementing recovery measures to keep concurrent projects on time.
- Control project budgets and cost forecasts, preparing monthly financial reports, monitoring expenditure against approved budgets, and flagging deviations to stakeholders in a timely manner.
- Direct and coordinate more than ten engineers and forty subcontractor crews operating across simultaneous project sites, setting performance expectations, reviewing progress, and resolving technical and logistical conflicts.
- Supervise construction works on site across multiple projects, conducting regular inspections to verify compliance with drawings, specifications, and quality standards; identify and close non-conformances before they affect programme or cost.
- Manage procurement of materials and subcontract packages, reviewing technical submittals, material certifications, and method statements prior to approval and mobilisation.

- Coordinate with municipalities, supervision consultants, donor representatives, and end-user communities; prepare and submit donor-grade progress reports and project documentation.
- **Notable project:** led the full project management and technical delivery of multiple solar water pumping systems across Bekaa municipalities, funded by UNICEF and ESFD, from feasibility and procurement through installation and handover.

Project Manager *October 2016 – December 2021*
Elie Maalouf Establishment | *Bekaa, Lebanon*

- Managed a portfolio of multi-million-dollar public infrastructure, academic, and healthcare construction projects funded by UNHCR, CDR, World Bank, UNDP, and ESFD, with full accountability for execution, scheduling, procurement, cost control, and project accounting.
- **Academic projects:** delivered the rehabilitation and expansion of 21 public schools (16 under UNHCR, 5 under CDR) covering structural strengthening, WASH facility upgrades, waterproofing, and capacity expansion; also delivered the Sariine Public School and Ersal Nursery and Workshops complex (Kuwait Funds / CDR).
- **Healthcare projects:** managed the COVID-19 rapid-response expansion of ICU and isolation capacity across four governmental hospitals (Baalbeck, Tripoli, Halba, Zahle), executing fast-track structural-steel extensions and complex MEP works against pandemic-driven deadlines.
- **Infrastructure projects:** supervised construction of the Qaraoun sewer network and pumping stations (UNDP/CDR), Ouzai stormwater lines and coastal road expansion, El-Kaa artificial irrigation lake, and the East Zahle Union of Municipalities headquarters building.
- Administered FIDIC Red Book contracts across the full lifecycle: tender preparation and evaluation, subcontractor management, payment certification, variation orders, claims assessment, dispute resolution, and final account closure.
- Directed scheduling, procurement, project accounting, and quality compliance in line with international donor reporting standards; coordinated daily with municipalities, OAR-registered consultants, donor engineers, and government supervisory bodies.
- Managed subcontractor performance across concurrent sites, setting programme milestones, reviewing method statements, and enforcing quality and HSE requirements throughout execution.

Independent Engineering Consultant (Part-Time) *May 2016 – July 2021*
Zouheir Hajj Sleiman Engineering Office | *Bekaa, Lebanon*

- Provided independent site supervision and technical advisory services for residential and commercial construction projects in the Bekaa region, concurrent with full-time employment.
- Coordinated with municipalities on public works projects including sewer lines, roads, and water networks; managed permitting and site handover processes.

Junior Civil Engineer (Part-Time, concurrent with BE studies) *January 2012 – May 2016*
Hands Group | *Beirut, Lebanon*

- Supported senior engineers in the execution and supervision of residential and commercial projects during bachelor's degree studies.
- Gained foundational experience in reinforced-concrete construction, site inspection, code compliance, and quality control.

EDUCATION

Master of Engineering (M.E.) — Structural Engineering *2017*
American University of Beirut (AUB) | *Beirut, Lebanon*

Bachelor of Engineering (B.E.) — Civil & Environmental Engineering *2016*
Beirut Arab University (BAU) | *Beirut, Lebanon*
